

## **UPCOMING ROAD MAINTENANCE** **IN YOUR NEIGHBORHOOD**

June, 2017

Dear Resident or Business Operator:

Weather permitting, we will soon be maintaining several arterial streets in Seattle. Through the Crack Seal Program, SDOT crews will fill cracks in the pavement with a low-tack sealant to reduce the infiltration of surface water, thus slowing the deterioration of the roadway. This work will be helpful in preventing the formation of potholes and other pavement distresses.

The crack-filling work will be done at these locations that include your neighborhood:

- **NW 65 St – from 15 Ave NW to 32 Ave NW**
- **Greenwood Ave N – from N 67 St to N 85 St**
- **Greenwood Ave N – from N 105 St to N 112 St**
- **Leary Wy NW – from 9 Ave NW to NW 36 St/ 2 Ave NW**
- **NW 85 St – from 15 Ave NW to 32 Ave NW**
- **3 Ave NW – from NW 65 St to NW 80 St**
- **3 Ave NW – from NW 92 St to Holman Rd NW**
- **3 Ave NW – from NW 113 Pl to NW 117 St**
- **NW Market St – from NW 54 St to 32 Ave NW**
- **NW Market St – from Greenwood Ave N to 3 Ave NW**
- **NE 71 St – from 6 Ave NE to Green Lake Dr N**
- **NE 75 St – from Banner Wy NE to 20 Ave NE**
- **N 145 St/ NE 145 St – from Aurora Ave N to Lake City Wy NE (eastbound lanes only)**
- **W McGraw St – from 6 Ave W to 9 Ave W**
- **W McGraw St – from Queen Anne Ave N to 3 Ave W**
- **E Cherry St – from 14 Ave E to 23 Ave E**
- **Beacon Ave S – from 59 Ave S to S Leo St**
- **51 Ave S – from Rainier Ave S to S Bangor St**

**PARKING:** Parking will be temporarily restricted on both sides of the street as the work will address all cracks from curb to curb. “No Parking” signs will be installed approximately 72 hours prior to start of work. The parking restrictions will be in effect from 7 AM to 5 PM, and are removed as soon as the maintenance work is done. The crack seal process is typically done within a day.

**LANE CLOSURES:** There will be **no** full street closure during the operation. However, we will close lanes intermittently, and parking will be restricted. Lane closures may last approximately 3-4 hours. Access to driveways or alleys may be disrupted for a few minutes during the road maintenance, but SDOT crews will work to minimize any delays and will provide assistance as needed. Traffic flaggers will be present during maintenance work. Sidewalks will remain open at all times.

**SCHEDULE:** The project will commence in mid-June likely in the order shown above and will continue through the summer months. Due to weather dependence and other unforeseen factors, the order and road work schedule is subject to change. The installation of “No Parking” signs prior to the start of work will be a good indication of our upcoming work on your street. If you need more information regarding the schedule, please contact us.
